Demo report. Generated by Ledger from the Reson8 demo data. Revenue, burn, cash, customers, deals and meeting notes are invented for a hackathon demo and are not Reson8's real figures. The SDK download counts are real public data.

RESON8 · INVESTOR UPDATE

October 2026

From Thomas (CEO) · Month closed 31 October 2026 · Every figure links to the record it came from (list at the end).

In short

- ARR reached **€413k**, up 17.3% on September, and we signed our first healthcare customer: a paid pilot with Noorderlicht Zorggroep across 9 clinics. `stripe-oct-close` `hs-deal-1160`
- **Default alive.** If ARR keeps growing at October's rate, revenue covers costs in Nov 2027 with €1.83M still in the bank. Below 8.6% a month we would be default dead.
- Lowlights: burn rose €33k after two speech engineers joined, runway fell from 21 to 17 months, one customer churned, and demo bookings dropped for a week while our ad account was suspended. That is fixed.

ASK

Referrals for a senior speech scientist. We are interviewing, and our second candidate has a strong background in low-resource languages, but the pipeline for this role is thin. An intro to anyone strong in speech recognition for European languages would help most. `jamie-mtg-1019`

KEY NUMBERS

METRIC	SEPTEMBER	OCTOBER	CHANGE	SOURCE
ARR	€352k	**€413k**	▲ +17.3%	`stripe-oct-close`
Paying teams	41	**44**	▲ +3	`hs-oct-close`
Net revenue retention (12 mo)	104%	**112%**	▲ +8pp	`stripe-oct-close`
Demos booked	96	**115**	▲ +19	`hs-oct-close`
Net burn	€198k	**€231k**	▼ +€33k	`stripe-oct-close`
Cash	€4.12M	**€3.89M**	▼ −€230k	`stripe-oct-close`
Runway	21 months	**17 months**	▼ −4	`stripe-oct-close`

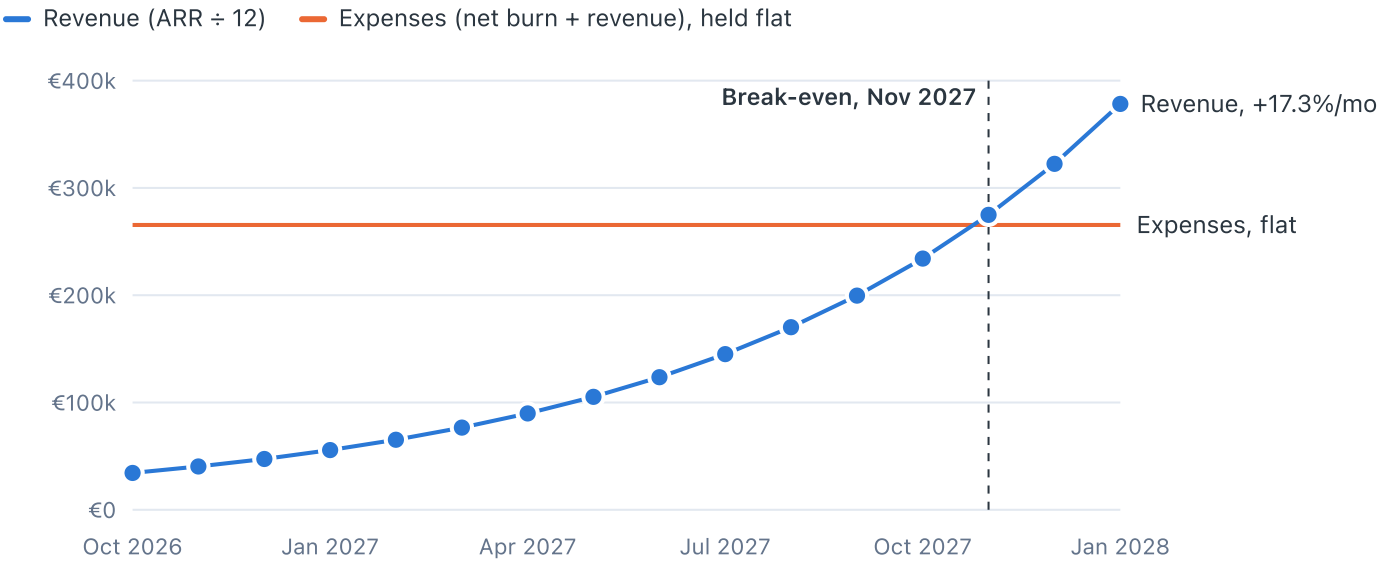

Net revenue retention is new in this update. Our lead investor asked for it on our 3 October call. `jamie-mtg-1003` ▲ and ▼ mark the direction that is good or bad for the business, not just up or down.

DEFAULT ALIVE OR DEFAULT DEAD?

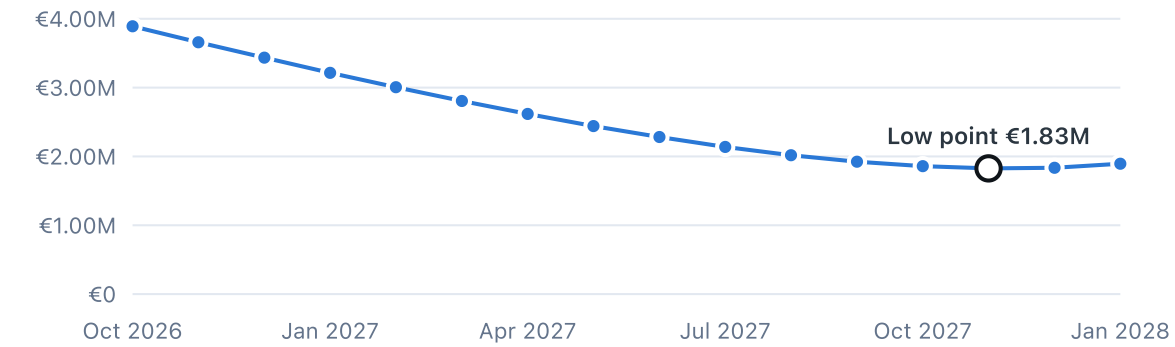

✓ Default alive

Paul Graham's test: if costs stay flat and revenue keeps growing at this month's rate, do we reach profitability before the cash runs out? At 17.3% monthly growth, yes: break-even in Nov 2027 (13 months) with €1.83M left. `stripe-oct-close` `stripe-sep-close`

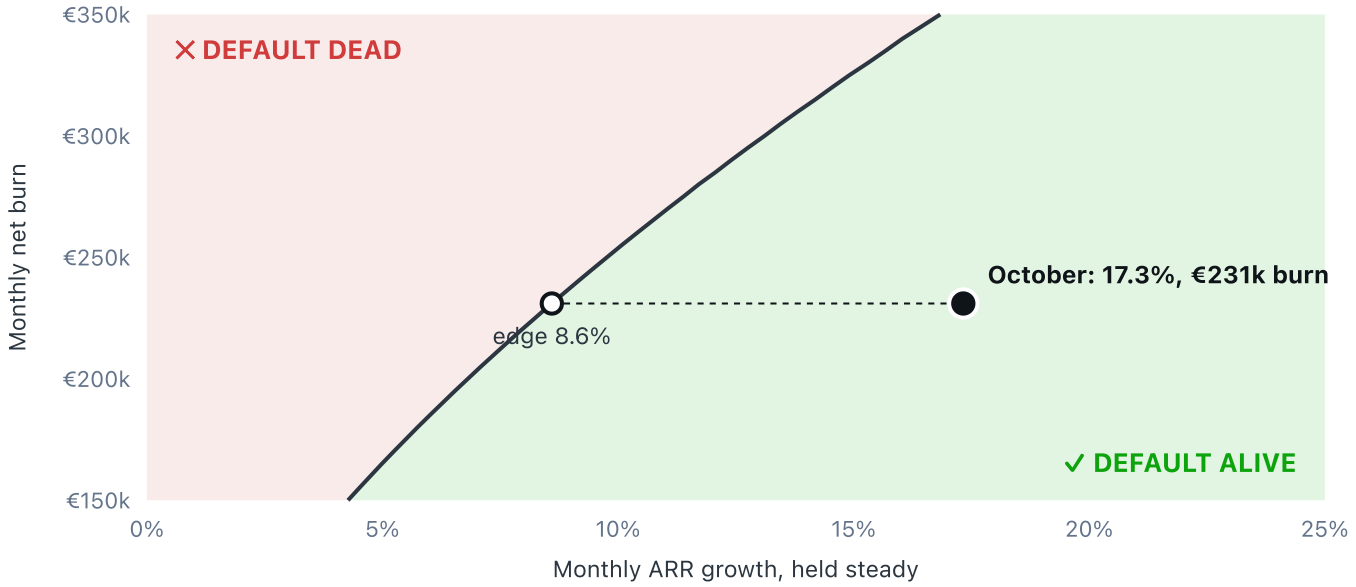

Monthly revenue against monthly expenses

Cash in the bank

Dead or alive map: where October puts us, and how far we are from the edge

Each point is a steady monthly growth rate and a monthly net burn, starting from October's ARR and €3.89M cash. Left of the line, the cash runs out first. At today's burn the edge is 8.6% a month, so growth can roughly halve before we are default dead. At today's growth, net burn could rise to about €356k a month before it flips.

MONTH	REVENUE / MO	EXPENSES / MO	CASH
Oct 2026	€34k	€265k	€3.89M
Jan 2027	€56k	€265k	€3.22M
Apr 2027	€90k	€265k	€2.62M
Jul 2027	€145k	€265k	€2.14M
Oct 2027	€234k	€265k	€1.86M
Nov 2027	€275k	€265k	€1.83M

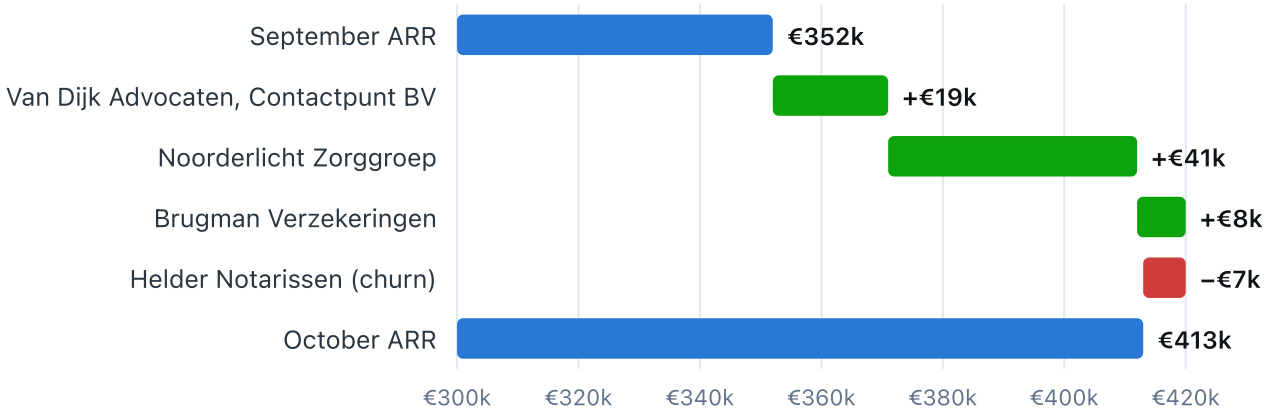

This is a projection, not a forecast. It assumes October's growth holds and costs stay flat, which a hiring plan would change. The figures are computed in code from the confirmed facts, the same way the app does it.

CUSTOMERS

Four new paying teams and one loss: net +3, to 44 paying teams. `hs-oct-close`

CUSTOMER	WHO	DEAL	ARR	SOURCE
Noorderlicht Zorggroep	Healthcare. First healthcare customer.	Paid pilot, 9 clinics	+€41k	`hs-deal-1160`
Van Dijk Advocaten and **Contactpunt BV**	Law firm and contact centre	Annual Growth contracts, up from Pro	+€19k combined	`hs-deal-1142`
Brugman Verzekeringen	Insurance	Annual Growth contract	+€8k	`hs-deal-1178`
Helder Notarissen (lost)	Notary practice	Acquired by a firm on another vendor	−€7k	`hs-churn-0231`

How ARR got from September to October

Noorderlicht's procurement team told us zero audio retention, EU-only processing and our ISO 27001 certificate were what cleared their review. `hs-deal-1160` `jamie-mtg-1012`

PIPELINE WE ARE NOT COUNTING YET

Noorderlicht wants all 14 clinics in Q1. Their clinical lead said this at the pilot review on 27 October, and clinicians report dictation is noticeably faster than their previous vendor on Dutch medical vocabulary. Nothing is signed and there is no written confirmation, so it is not in any number above. Procurement will revisit in December. `jamie-mtg-1027`

CHALLENGES

> **Burn up €33k to €231k, runway down to 17 months.** Two speech engineers started on 5 October. Runway fell four months, from 21 to 17, at the new burn. `stripe-oct-close`

> **Demo bookings fell from 41 to 11 in week 42.** Our LinkedIn ad account was suspended on 14 October because the company card on file had expired, and posting paused while Mirte was out sick for two days. Fixed: the card is replaced, a backup payment method is on file, and ads have been delivering since 21 October. Week 43 was back to 34. `li-wk42` `li-wk43`

> **We lost Helder Notarissen (−€7k ARR).** They merged into a larger firm that had already standardised on another vendor. `hs-churn-0231`

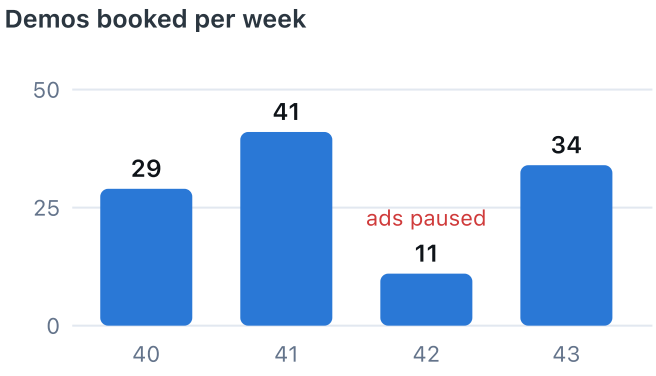

> **Hiring a senior speech scientist is slow.** The candidate pipeline is thin. That is this month's ask. `jamie-mtg-1019`

PRODUCT

- **Frisian and Swedish are generally available** (v1.8), taking the API to 10 European languages, with mid-conversation language switching across all of them. `gh-rel-1.8`
- **Realtime latency down 38%**: p95 from 410ms to 254ms on the EU cluster, after a streaming decoder rewrite. `gh-pr-349`
- **Barge-in tuning for the Turns API**: voice agents stop within 180ms (median) when a caller interrupts. `gh-pr-318`
- **Diarization v2** (v1.9) detects the number of speakers on its own and handles overlapping speech, at the same price. `gh-rel-1.9`

GROWTH

- **115 demos booked**, up from 96. The "Hear every word" campaign launched on 1 October for healthcare and legal teams in NL and DE. `hs-oct-close` `li-wk40`
- Our **word error rate benchmark** on Dutch medical dictation reached 47,000 impressions and drove a record 41 demos in one week. `li-wk41`
- **Free to Pro conversion rose to 6.4%**, from 5.1% in September. `stripe-plg-oct`
- **SDK downloads: 30,735 in 1 to 23 October**, already past September's 21,568 (PyPI 3,941, npm 26,794). These include CI installs, so they track developer adoption rather than users. Real public data. `pkg-oct-23`

TEAM

- Two speech engineers joined on 5 October. `stripe-oct-close`
- Jarno is running interviews for a senior speech scientist. The second candidate goes to a second round. `jamie-mtg-1019`

NEXT MONTH

- Close the senior speech scientist search, or widen it with your referrals.
- Prepare for Noorderlicht's procurement review in December, where the 14-clinic rollout gets decided.
- Keep net revenue retention in every update from now on.
